Date: 12/18/2012 07:51 PM

Clean Harbors has sounded the all clear and are allowing personnel to leave. The smoking slowed down enough to open the doors and put water on the waste. The run-off is being collected via vac truck and will be placed in frac tanks. The Fire Chief has been informed that you are on your way. Karen Duke is to find out their plans for the night and will let me know so that I can forward on to you.
